- \* Nylon Strength Rating: 5,000lbs
- \* Shackles: 316 Forged Stainless Steel
- \* Shackles Strength: 3500 lbs
- \* Weight: 16oz.
- \* Color: Black (0093)

#### **Customer Testimonials:**

"During a rough night at anchor near Barkley Sound (west coast of Vancouver Island), our boat was lurching like a bucking bronco. We added a Shockle to our anchor chain and the relief was immediate. No noise and no worries about the anchor tearing loose during the big wind gusts. Thanks for a great product!"
