'Tis the Season Holiday Guide

< FENDER BENDER

To avoid fender mishaps, or breakage, allow it to move with your boat's motion with the new Shockles Fender Friend. The Fender Friend (\$9.07-\$16.95) allows your fender to slowly rotate in place if it happens to get caught between the dock and the boat. This saves you from broken ropes/straps, bent stanchions, or fender eye rips. The Fender Friend protects you and your boat, clips easily on and off your stanchion, and is guaranteed for life. (888) 557-6464, www.shockles.com.

> ILLUMINATION

Add light anywhere with Sollight's new RailLight. This stainless-steel, solar-powered LED light quickly and securely clamps onto any railing (from 3/4" to 1 1/4" diameter), with a tough nylon clamp that adjusts to any height or angle. The RailLight (\$27.95) also comes with the custom Transom Clamp, making it perfect for attaching to dinghies, rowboats and canoes, as well as toerails and stanchions—anywhere you want light for safety, visibility or work. Now you can read, dine or relax in a pleasant and safe atmosphere. (888) 557-6464, www.sollight.com.
